

## Software Asset Management

*Gain control of your software assets and costs with Infinity's Software Asset Management.*

Given the complexity of software acquisition options, the multiple payment streams that stack up over the years, and the variation in software product lifecycles, many companies are overpaying for software licenses, or even paying for licenses that are no longer in use, resulting in wasted expense.

At Infinity Systems Software, software expertise is a core competency. We not only architect solutions to meet our client's unique needs, but we help them optimize their legacy investments. Our Software Specialists help companies gain control of their software assets and costs with Software Asset Management.

### **Infinity Systems Software's Software Asset Management Solutions:**

Infinity's Software Specialists will evaluate your software assets from the financial, contractual and technical perspectives. We'll recommend actions that can save you money and administrative headaches.

- Inventory all of your software asset, licenses and charges
- Determine software utilization
- Identify unused, underutilized, redundant, or obsolete assets that are costing you money unnecessarily
- Ensure that your software licenses are up to date and that you are in legal compliance
- Evaluate your software usage and version charges
- Assist in renegotiate your software contracts to save you money where possible

### **INFINITY'S SOFTWARE ASSET MANAGEMENT DELIVERS VALUE:**

- Improve management of your software assets
- Eliminate redundant and obsolete assets
- Maximize resource utilization
- Ensure legal compliance
- Reduce cost structures
- Better manage procurement and budgeting
- Align to more advantageous contracts

- 
- Recommend alternative assets where a technological or financial advantage can be gained
  - Alert you to upcoming lifecycle events requiring action
  - Provide a roadmap for tracking and managing your assets more effectively through their lifecycles

(Over, please)

## Demonstrated Success

A State Assembly operating under budget constraint was challenged with antiquated technology and back-leveled software they were not able to upgrade. Infinity's Software Management Assessment revealed utilization patterns and determined that the client's software licensing structure was not optimal. Converting to a pricing program that charged based on utilization provided significant savings – enough to pay for a system and software upgrade within ten months.

## Why Infinity Systems Software for Software Asset Management?

At Infinity Systems Software, software is a core competence. Our Software Specialists have both the deep technical expertise and the financial acumen to ensure that you are optimizing your investment.
